

# Education

New Girls House, Uppingham School

BCAL have extensive experience in the civil and structural design of education facilities ranging from day nurseries through to further education establishments.

In the public sector we have completed new schools at Daventry, Northampton, Kettering and Milton Keynes, extensive re-development of Thomas Beckett School, and numerous school extensions for local education and diocesan authorities.

In the private sector, our projects include the award winning Leonardo Centre at Uppingham School.

Our further education portfolio includes major extensions and refurbishment to the facilities at Moulton College and projects at Northampton, the Open and De Montfort Universities, together with the prestigious campus at Kings Cross for the University of Arts London.
