

Education

New Girls House, Uppingham School

BCAL have extensive experience in the civil and structural design of educational facilities, ranging from day nurseries through to further education (FE) establishments.

In the public sector, we have completed new schools at Daventry, Northampton and Kettering, an extensive re-development of Thomas Becket School, and numerous school extensions for local education and diocesan authorities. We have recently completed a new Academy School at Milton Keynes.

In the private sector, our projects include the award winning Leonardo Centre at Uppingham School.

Our FE portfolio includes major extensions and refurbishment to the facilities at Moulton College, De Montfort and the Open Universities. At Kings Cross, we are currently involved with a prestigious new campus for the University Arts of London.
