

Castle Theatre

The practice is particularly noted for its work in the leisure industry.

Our extensive skills have been commissioned to undertake many varied schemes in this growing sector:

- Theatres with their requirements for fly towers, auditorium spaces and social facilities.
- Health clubs, swimming pools, training spaces and gymnasias.
- A fishing heritage centre and museum with an internal dock.
- Banqueting halls, restaurants and public houses.
- Sports halls with changing and social facilities.
- Football ground improvements and complete new stadia.
- Golf club facilities, driving ranges, structural landscaping features and water management schemes.

We believe that we are equipped to advise the client on the diversity of developments that will be required for the future.
